*“Placed in between organizations and technology, I am committed and enthusiastic in what I do. Driven by great challenges and learning opportunities, I look forward to combining technical knowledge with interpersonal skills.”*

## Summary

I have been a passionate web developer since middle school where I was using Q-Basic and Pascal. In high school, I completed a two-year program in Information Technology. More recently, I finished the Full Stack Web developer bootcamp from the Londonappbrewery training centre, UK. One of my goals is continuous improvement of my web development expertise. My dream job is working in a competent and supportive web developing team that creates reliable and functional websites and applications that help achieving customers their goals. I would like to best utilize my abilities by generating maximum traffic to clients' web projects by showcasing high-quality SEO content, user- and mobile-friendly navigation and promotion to as many social media platforms as possible.

## Projects & Courses

### TechWomen (Cohort 4) from ISSofBC

Vancouver, Canada

WEB DEVELOPER

2021

- TechWomen is a 9-month part-time pre-employment program funded by the Canadian Women's Foundation that offers newcomer women an entryway into Web Development and foundational skills towards a career in the tech industry. It is offered through ISSofBC with the support of partnering schools – Lighthouse Labs, CodeCore, BrainStation and Emily Carr University. The program includes occupational specific language training, an introduction to coding, front-end development and digital design through our partner tech schools, job readiness and soft skills training, and a practical component.

- This course introduces the fundamentals of website design. Content includes technical and aesthetic issues of developing a website, such as writing code effective across multiple browsers and devices, and producing bandwidth-friendly graphics for site.

- This course provides a comprehensive introduction to Adobe Creative Cloud, including Illustrator, Photoshop and InDesign. As integrated software tools for the design and production of print and media assets, you will be introduced to topics including document layout, type-setting, vector and raster images for print and digital outputs. Gain basic knowledge of each program, and how they work together as an integrated toolkit.

### **The App Brewery**
